

PREDICONCONSULT is a Consulting Company and Training Center in the fields of Data Science, Predictive Analysis, Decision Support, Business Management, and Information Technology Systems. PREDICONCONSULT provides comprehensive solutions that include software, training, consulting, as well as workshops and professional meetings.

Our comprehensive solutions, know-how, and expertise are at the service of your projects.

SOFTWARE: With over 25 years of experience in the fields of Data Science, Predictive Analysis, and Decision Support, and thanks to our partnership with Forecast Pro, our team is dedicated to assisting you in selecting the most powerful and reliable forecasting tools and methods. We guide you in seamlessly integrating them into your company's Information System.

Forecast Pro brings your data, forecasts, and your business into the era of Artificial Intelligence.

TRAINING PROGRAMS: Through our innovative training programs, we raise awareness among your collaborators to develop a culture of Data Science, Predictive Analysis, Decision Support, Cybersecurity, and Artificial Intelligence.

We help you anticipate the new practices and skills of tomorrow.

CONSULTING: Data-driven demand and supply chain forecasting enables the optimization of the company's operational processes: planning, production, marketing, sales, etc. We assist you in adopting innovative approaches and using reliable tools tailored to your activities to enhance your performance and results.

We accompany you to bring your projects to life through the expertise and experience of our team and our partner consultants.

EVENTS: PREDICONCONSULT and its partners regularly organize conferences, workshops, and webinars to share learning and best practices on Predictive Analysis and Data Science from experts in these fields.

By participating in these events, you will meet and share your experiences with new people and your peers. You will strengthen your skills and expertise.

We understand your needs and expectations and the specificities of your industry.

Each sector of activity has its own needs, specificities, and requirements in the domains that are at the core of our skills and expertise. We support you in your projects and achievements with solutions tailored to your professions and activities.

SOFTWARE

With over 25 years of experience in the fields of Predictive Analysis and Data Science, and thanks to our partnership with Forecast Pro*, we guide you in selecting the most powerful and reliable analysis and forecasting tools and methods. We assist in integrating them into your company's Information System.

Forecast Pro*, the essential tool for forecasting, available in multiple versions

Forecast Pro is an unparalleled forecasting software in the market, available in three versions. It is a standalone tool for forecasting product or service sales or, more broadly, any phenomenon influenced by time, combining proven statistical methods and an intuitive interface.

Used in virtually all industries, Forecast Pro makes sophisticated forecasting techniques accessible to everyone. With an unmatched price/performance ratio, it is a market leader.

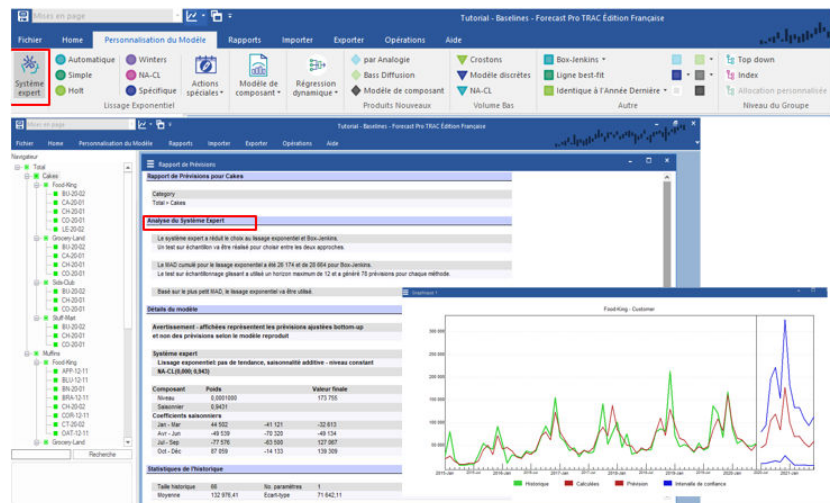

You can be operational in just a few days, or even hours. Forecast Pro is available in ten foreign languages, and its various versions have been distributed since 1986 in more than 12,000 organizations and businesses worldwide, used by over 40,000 clients.

Forecast Pro utilizes an expert system of artificial intelligence and a rich and powerful methodology.

The teams at our partner BFS (Business Forecasting System) regularly develop and integrate the latest innovations in forecasting methods into the tool to maintain Forecast Pro at a very high level of performance and reliability.

We offer a multitude of forecasting methods that adapt to all your data and allow you to obtain reliable, adaptive, and easy-to-manage forecasts. Among the numerous benefits, Forecast Pro enables:

- Automatic statistical forecasting by expert system
- Custom hierarchies and multiple units of measure
- Collaborative adjustment and forecasting
- Sales and Operations Planning (S&OP)
- Forecast performance reports
- Exception reports
- Management of promotions and special actions

CONSULTING

Our Consultants and Technical Experts dedicated to the development and growth of your business.

Our consultants work closely with our clients to understand their needs, conduct a diagnosis of the current situation, and propose solutions tailored to those needs.

Our Technical Experts specialize in the fields of Data Science, Cybersecurity and Information Systems, Artificial Intelligence, and Decision Support Techniques. They accompany and bring their expertise to our clients to diagnose and solve complex issues.

They can intervene on specific assignments or on longer-term projects. They are experienced in collaborative work and teamwork, communicate clearly with various project stakeholders, and manage constraints inherent to any project (timelines, budgets, resources).

Depending on the nature of the study, expertise, and consulting mission, and the objectives of our clients, we prepare a Proof of Concept (POC), which is a "prototype" that allows testing and validating a project or solution while considering the initial specifications. A POC provides the advantage of validating specific aspects of your project and ensuring that it meets the requirements before moving on to a full-scale phase or "proof-of-concept" model.

At the end of each mission, deliverables and recommendations undergo a workshop to share and discuss the results.

EVENTS

With over 25 years of experience in the fields of Data Science, Cybersecurity and Information Systems, Artificial Intelligence, and Decision Support Techniques, and thanks to our collaborations with French and international organizations and associations, we organize workshops and conferences in France and around the world.
